# Experience the Emily Grene Difference

Some firms provide ideas and reports. Other firms engineer. A few only install. Emily Grene does it all. From our beginning, we have integrated engineering and design services with construction and installation. With trained electrical, controls, and construction professionals and a full-strength data management team on our side, challenges are met with maximum speed and minimal fuss. The result? Exceptional quality and cost control, all brought to you with on-time completion and satisfaction. With Emily Grene as your partner, you'll receive customized design, personalized service, and singular results. As a nationwide leader in energy efficiency solutions, we provide highly efficient LED lighting and other solution to some of America's most trusted companies. Our experience in HVAC, lighting installation and retrofit, automation, real-time monitoring, and predictive maintenance make us a holistic solution for all commercial needs.

## How We Work

Emily Grene is a leading national energy efficiency firm with unmatched implementation experience. With us, you will have the confidence that comes from decades of lessons learned in ighting and energy efficiency, and our clients will attest to our track record of success and commitment to do whatever it takes to get the job done. What's more, our unique combination of experience across energy auditing, project design, construction, project administration, building controls, and utility incentive management differentiate us from the competition.

### Energy

At Emily Grene, we offer a one-stop resource for energy challenges, backed by proven results. Our comprehensive consulting and modern solutions keep your company one step ahead and power your projects forward.

### Automation

EG Automation is testament to the power of one. Bringing all of your data together, our dashboarding services integrate your systems, devices, and sensors into one easy-to-understand interface. One button. One click. All your live data. What could be easier than that?

### Build

Whether it's project planning or engineering and installation, we've got you covered. As a one-stop shop built for customer convenience, we create intelligent spaces and smart buildings with reliability you can trust and high-quality workmanship that maintains your brand's image.

## On Time. On Budget. On Top.

At Emily Grene, we believe we are not just another trade, we are a partner. Focusing on partnership, we provide exceptional service to our clients across residential, industrial, and commercial sectors. With skill and reliability that come from 100 years of collective experience, the technicians at Emily Grene bring a deep understanding of industry issues to the table alongside a customer-centric attitude. Their experience and mastery is reflected in every project detail—resulting in inventive answers, on-time completion, and measurable cost effectiveness. We get the job done, and we do every job well.

Our experience and versatility give us our competitive edge, which is why we are entrusted as one of the sole contractors to execute energy efficiency projects nationwide for one of America's most trusted brands. Partner with us and you'll receive customized design, personalized service, and singular results.

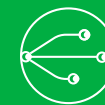

Rest assured that our dedicated team will provide you with solutions for efficiency you can trust.

Current partners include Walmart, Tri Point Homes, USC, and UCI.

#### Electrical

Underground, boxing, wiring, hotcheck, and finish to homeowners and residential developers nationwide.

#### Low Voltage

Low voltage structured wiring, security system installation, cable management, network, ongoing repair and maintenance.

#### Custom Design & Construction

Build projects from the ground up. Our end-to-end process includes integrated design, engineering, materials, manufacturing and construction.

#### System Maintenance

Alleviate system failures and shrinking budgets with customized preventive maintenance services that ensure uninterrupted operation.

#### Automation & Controls

Take the stress out of managing systems with our around-the-clock service. We also install, maintain, and repair automation and control facility systems.

#### Energy Efficiency Retrofit

Realize demonstrable energy efficiency savings with highly-customized, cost-efficient operational efficiency modifications.

#### Submetering

Optimize energy performance and secure your reputation as a leader in clean energy with accurate energy monitoring and consumption data helps you

#### HVACR

Our teams install and repair energy-efficient heating, ventilation, air conditioning, and refrigeration (HVACR) systems.

## Integration

EG Comfort provides design, start-up, commissioning, and service of fully-digital control systems including central plants, air handlers, VAV systems, split systems, ductless, and package units. We specialize in the integration of BACnet and Modbus central HVAC and building systems.
